Dear Ms. Rutherford:

The Apache Software Foundation has made available documents responsive to Oracle's subpoena. All of the documents in this production are designated CONFIDENTIAL under the protective order. However, as all documents are provided in the native format in which they are kept by ASF, they are not marked "CONFIDENTIAL" internally. If you have any objection to this means of designation, please let me know.

The production contains the following documents:

- Email messages from ASF's private development mailing list for harmony (in native "mbox" format)
- Individual contributor license agreements for Apache Harmony completed by Google employees
- Authorized contributor questionnaires for Apache Harmony completed by Google employees

A ZIP archive containing these documents can be downloaded from our servers:
